METAFLORA

KOL DECK

What is MetaFlora?

MetaFlora is the cannabis platform for consumers and the industry, secured on **FloraChain, our own Layer 1**.

Discover is a wallet-free marketplace for every legal market: dispensaries, live menus, deals, strains and verified genetics, with MetaFlora AI built in.

Product Passport & FloraSeal turn lab results and genetics into proof anyone can check with a QR scan.

Industry OS is the operating system for licensed businesses: compliance, trade and genetics IP in one workspace.

Project Goals

Bring **verifiable trust** to cannabis: every product traceable to its lab results and genetics, anchored on FloraChain.

Give consumers in every legal market one place to **find, compare and verify** what they buy.

Give licensed operators **one workspace** for compliance, Product Passports, B2B trade and genetics licensing.

Power it all with a **decentralized node network** that rewards the people who run it, then expand to the next agricultural sectors.

Strong points

Our own Layer 1. FloraChain is built for the cannabis industry: ~5-second blocks, low fees, CosmWasm smart contracts, staking and on-chain governance. The public testnet is live.

Real products, live today. Discover, Product Passport and Industry OS are built and in use, not slideware.

Verification that matters. No quality standard exists in cannabis; COA-backed Product Passports and FloraSeal fix that for consumers, retailers and regulators.

Strong tokenomics. 1B FLORA cap, per-block emissions, and the largest share of the community pool (50%) to node operators.

Industry roots. Founded by a cannabis entrepreneur with partners across the industry.

What we sell

We sell three tiers of MetaFlora Nodes, digital licenses (NFTs) to run node software on FloraChain. The **Connoisseur Node sale is in Phase 1** now.

Connoisseur Nodes

For cannabis connoisseurs and Web3 enthusiasts. Host the platform, process verification scans and data, and share the Nodes pool. Only 10,000 licenses.

Industry Nodes

For licensed operators, farms, labs and brands. Network participation paired with Industry OS tools.

Home Grower Nodes

For home growers. Connect your grow, register genetics and share your results.

Referral system

Everyone can join a mutually beneficial partnership with our referral program.

1) Go to **metaflora.xyz**
2) Register your account
3) Generate a referral link
4) Receive reward distributions to your connected wallet

You receive a **10% referral reward** as soon as your friend buys a Connoisseur Node.
With more referred purchases, your tier and commission rise to **11%, 12% and 14%**.

Basic Tokenomics

FLORA is the native token of FloraChain, capped at **1,000,000,000**.

New FLORA is minted every block: **50%** to validators and delegators, **50%** to the community pool, distributed 100% across five pools.

Utility: gas, staking, governance, marketplace, Token Factory, IP NFTs, AI services and node rewards.

Community pool	Share
Nodes	50%
Ecosystem	32%
Treasury	10%
Operations	5%
Liquidity	3%

Roadmap

2024 · Launch ✓

- Brand, community and first website
- Node design, progressive-pricing sale and referral program
- Cannabis Europa & Mary Jane Germany
- Strain library and Knowledge Hub launch

FloraChain ✓

- FloraChain, our own Layer 1, built for the cannabis industry
- Public testnet live at testnet.metaflora.xyz
- Block explorer, faucet, staking and governance
- NFTs, custom tokens, AMM and liquidity pools

Discover App

- Wallet-free marketplace for every legal market
- Live map, dispensary profiles, menus and deals
- Strain profiles, Verified Labs, genetics catalog
- MetaFlora AI assistant

Industry OS

- Compliance workspace, lab reports and audit export
- Product Passport: lab PDF to verifiable QR
- B2B Trade Board and Deal Inbox
- Genetics register, IP licensing and royalties

In Progress

- MetaFlora app (iPhone first)
- Dispensary loyalty tokens on FloraChain
- Seller checkout and featured products
- Onboarding licensed operators

Next Up

- FloraChain mainnet
- Node operator rewards live on mainnet
- FloraSeal labels across partner products
- New markets and the next agricultural sector
